Ground Transportation/Runner: As soon as flight/travel information is available, the Tour Manager will forward the schedule to you. Ideal transportation for the band & crew from the airport is **one 15- passenger van with two back seats removed**. If no airport run is required, a single van will do. The runner will need to transport the crew to the venue in time for load in, bring the band to the venue for sound check, return band/crew to hotel after sound check, and bring the band/crew back to the venue in time for the show (or meet-and-greet) – time and distance permitting, of course. After the show, the runner will return the band to the hotel, then come back for the crew, band gear, and merchandise and return them to the hotel. Full details should be before the show date.
